

Bosstag M50 (AM)

Security tag

 Security: Very High  Detection Range: High

Bosstag M50's unique design offers the highest security available in tags, featuring a revolutionary multipolar locking mechanism, which cannot be opened by powerful magnets or hooks. Only the Multipolar Detacher can remove the M50 tag.

Its innovative two-piece shell design is universally acknowledged as the most secure, offering more resistance to tampering.

The M50 is available in AM frequency, ensuring it is compatible with existing security tag systems already installed.
